Describe as being within a 40-acre subdivision of public survey, or by course and distance to a section-corner. If on unsurveyed land, it should be so stated.

IF THE WATER IS TO BE USED FOR IRRIGATION, SUPPLY THE FOLLOWING INFORMATION:

- (a) Number of acres to be irrigated is 120.
- (b) Description of land to be irrigated SE $\frac{1}{4}$ NW $\frac{1}{4}$, SW $\frac{1}{4}$ NE $\frac{1}{4}$, & NE $\frac{1}{4}$ SW $\frac{1}{4}$
Describe by legal subdivision, or if on unsurveyed land it should
Sec. 9, T.46 N., R.63 E., M.D.M.
be so stated and a description provided in accordance with special instruction from the State Engineer when application is returned for correction.

- (c) Irrigation will begin about April and end about
Month
October, of each year.
Month

IF WATER IS TO BE USED FOR POWER, MINING, TRANSPORTATION, OR OTHER USE, SUPPLY THE FOLLOWING INFORMATION:

- (d) Power to be developed is _____ horsepower.
- (e) Works to be located _____
Give 40-acre subdivision on which works will be located, or locate by course and distance to a section-corner.

- (f) Point of return of water to stream. Not to be returned.
Describe in same manner as point of diversion.

- (g) Remarks _____

DESCRIPTION OF PROPOSED WORKS

Rock and earth dam at point of diversion, thence by main ditch to

State manner in which water is to be diverted, whether by dam or other works, whether through pipes, ditches, flumes, or other conduits. If water

place of use. Laterals to be constructed from main ditch for dis-

is to be stored in reservoirs, it should be so stated and the location of the reservoir should be given with reference to the legal subdivisions.

tribution of water.

5. Estimated cost of works: \$125.00.

6. Estimated time required to construct works 1 year.

7. Remarks: Applicant files herewith his application for 1.2 second feet of water from Cottonwood Creek for irrigation of same 120 acres of land but amount of use under both applications will not exceed statutory limit as waters available from these sources last only for brief period in flood season.

Seth D. Mulkey. Applicant.

APPROVAL OF STATE ENGINEER

This is to certify that I have examined the foregoing application, and do hereby grant the same, subject to the following limitations and conditions:

The amount of water to be appropriated shall be limited to the amount which can be applied to beneficial use, and not to exceed 1.20 cubic feet per second.

Actual construction work shall begin on or before June 7, 1922.

Proof of commencement of work shall be filed before July 7, 1922.

Work must be prosecuted with reasonable diligence and be completed on or before June 7, 1923.

Proof of completion of work shall be filed before July 7, 1923.

Application of water to beneficial use shall be made on or before

November 7, 1925. Proof of the application of water to beneficial use must be filed with State Engineer on or before December 7, 1925.

Cancelled May 13, 1933 because of failure of applicant to comply with provisions of permit

WITNESS MY HAND AND SEAL this 7th day of November, 1921.

Geo. W. Malone
aP State Engineer

J. H. Sammons
State Engineer.

This permit is issued subject to all prior rights on the source. The amount of water herein granted is placed at the full statutory allowance of 1.2 cubic feet per second ~~for the full acreage applied for, notwithstanding the fact that this land has already been~~ granted a full water right under permit No. 6442 from Cottonwood Creek. In this manner the full statutory amount of water may be diverted from the North Fork of Cottonwood Creek under this permit when there is no water whatsoever available from the source described in permit No. 6442. However, the total amount of water which can be diverted from both sources described in the two permits shall not exceed the statutory allowance of 1.2 cubic feet per second for the 120 acres proposed to be irrigated. The applicant will be required, at the time of filing proof of beneficial use of water, to definitely segregate the areas of land which obtain water from each of the sources described in the permits. A substantial headgate and weir must be installed and maintained at or near each of the points of diversion to facilitate the measurement and control of water. The State reserves the right to regulate the use of the water herein granted at any and all times. It is distinctly understood that the applicant agrees to the terms herein contained.
